

Xody's Project - Detail(Humanitarian)

These projects are the projects that start the development in the area. The by the goal of 2008 and the steadily to
Humanitarian Concepts will be required to work on concepts that are humanitarian in nature for at least 10% of their
• The goal is to develop new technology that will benefit people in developing markets and to provide that
a low cost, low technology application that will be used in those markets at a low cost. The goal is to provide
reduced development cost for those markets and to provide that technology to those markets at a low cost.
